

About

Dr. Kathleen Behr

Specializing in cosmetic dermatology and dermatologic surgery, including Mohs surgery, Dr. Kathleen Behr's priority is providing patients with the highest standard of skin care. From a caring staff to her state-of-the-art technology, including multiple lasers, she ensures her patients have access to the latest treatment options. This commitment to excellence has helped her garner recognition as a top doctor, including receiving Allergan's prestigious "Top 50" status. "I listen to my patients and suggest a plan to help rejuvenate them, while keeping a very natural look. I want them to look their absolute best without looking like they've ever had anything done," says Dr. Behr.

"I always go above and beyond to provide outstanding patient care."

Nonsurgical Arm Lift

Dr. Behr performed two CoolSculpting treatments to slenderize this 62-year-old patient's upper arms. The after photo shows the patient four months after treatment.

What nonsurgical trends are you seeing at your practice?

Lasers for tightening and resurfacing; fillers for contouring; and Kybella to target fat and define the jawline.

How does your staff enhance your practice?

My staff is friendly and knowledgeable. This helps my patients relax and feel comfortable while getting treated.

How has your profession evolved?

There are many more noninvasive anti-aging treatments: We can now treat whole-face restoration rather than chasing lines.
